INTERNATIONAL EXPORTS PVT. LTD

(An ISO 9001, ISO 14001 Certified Company)

Company Profile

The Agro Biotech International Exports Private Limited Company Provide a wide range of technical products and solutions worldwide for House hold Products, renewable energy Products, Medicated Products, Agriculture, Organic Products etc.... We provide consultancy for complete engineering and turnkey solutions worldwide based on their need and requirements.

Agro Biotech is the reputed Exporter and Importer currently engaged in AGRICULTURAL, SPICES and HERBAL products. Since the establishment of the company in the year 2010, we have been successfully catering to the requirements of domestic as well as overseas clients. In this very short span of our commencement, we have attained a distinct position for ourselves. Our profound knowledge and involvement catapulted us to the global level of foreign trade. The directors of the company have more than 30 years of professional experience in their respective fields.

We have a dedicated and energetic team of expert professionals to cater diverse range of premium quality products for our clients globally. We continuously strive to provide customer specific products which are very popular in the international market. By reaching the farmers and manufactures directly we are able to maintain the 3 vital factors that viz. Fair Price, Incomparable Quality and Quantity and Precise Delivery.

In the manufacturing process all parts are rigorously tested before assembly. A number of inspection points are fixed for every component, as well as checks at each step of the manufacturing process. Once assembly is complete, additional testing process takes place to ensure the quality of each and every component. We guarantee to provide all our customers reliable quality and superior performance of products, reasonable price, and first-class after sales service and support. Our range of products are appreciated across the globe for its quality, technical superiority, performance, energy-efficiency and durability.

Our **Research and Development Division** is filled with a bunch of dedicated, enthusiastic professional Engineers, who are always for the continuous improvement of existing products as per the requirement of the Customers. Our dedicated supervisors monitor the entire manufacturing process to ensure stringent quality norms.

We are always dedicated to develop newer eco-friendly products of all sorts.

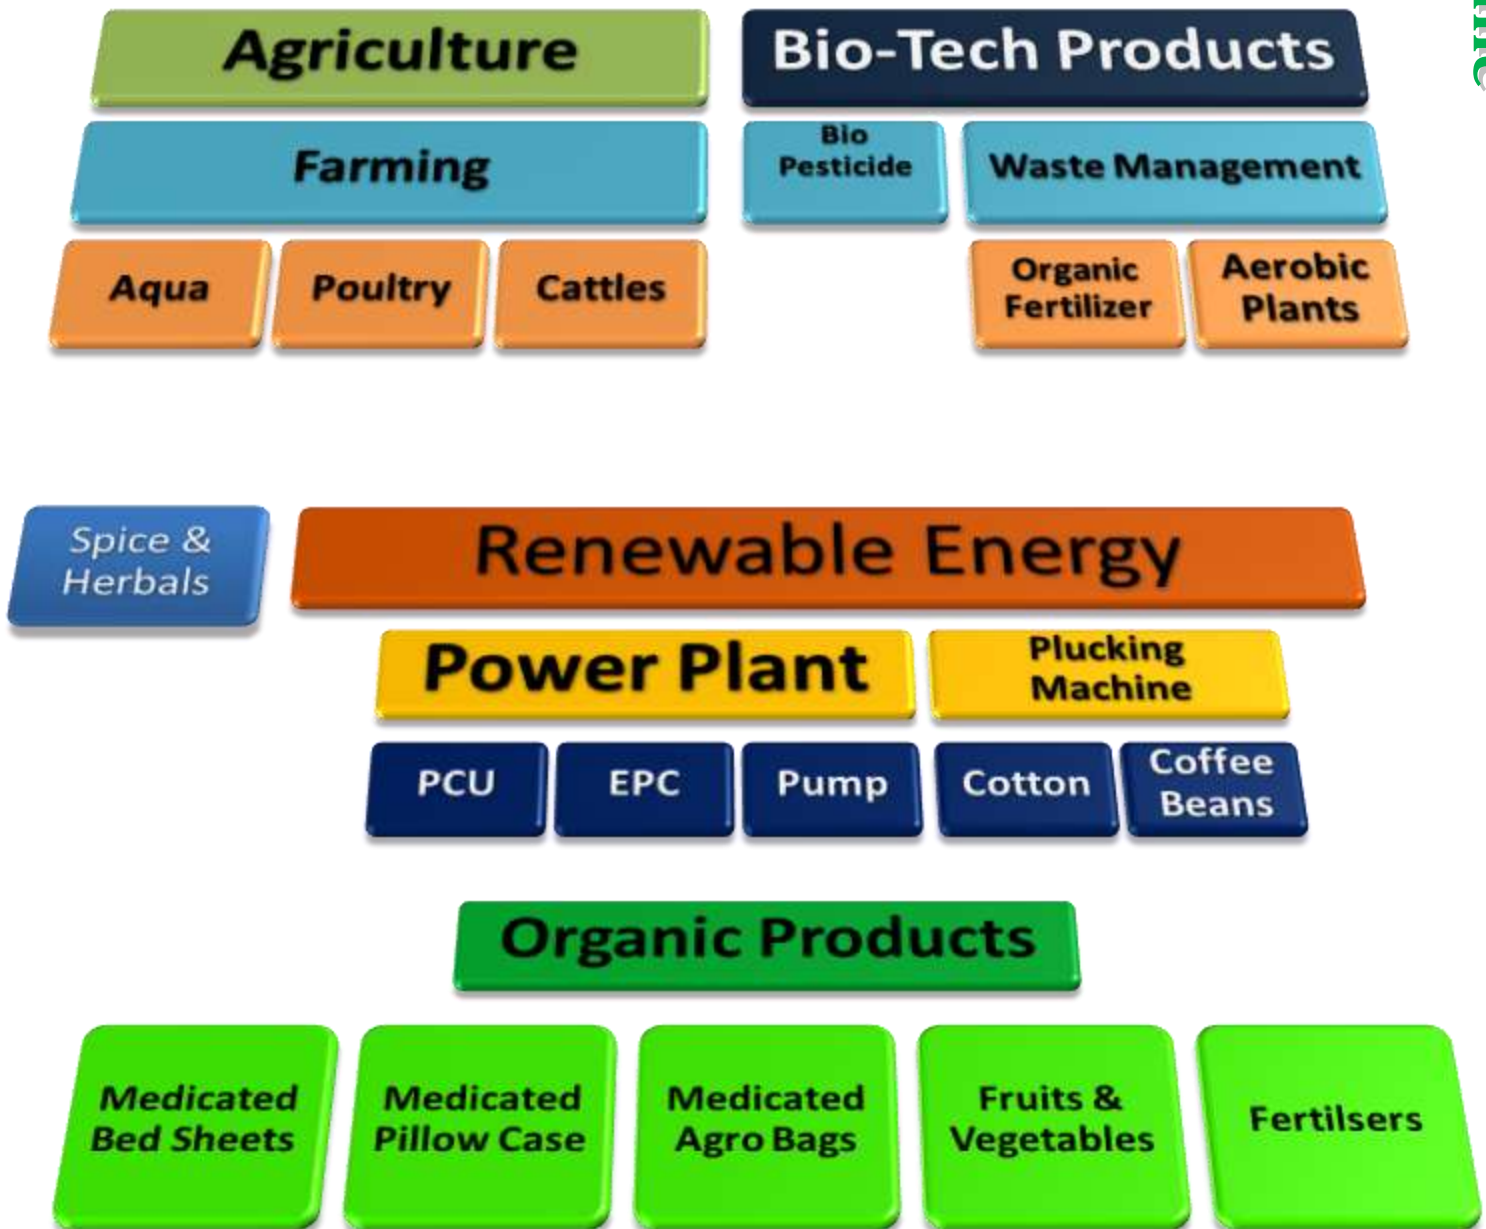

With the backing of a well-developed manufacturing unit and an in-house designing unit, we are able to maintain the quality of our products as well as ensure timely delivery.

Executive Summary

Agro Biotech International Exports Private Limited is the real hub for Importing and exporting the services and various indigenous Products. Since the establishment of the company in the year 2010, we have been successfully catering to the requirements of domestic as well as overseas clients. The directors of the company have more than 30 years of professional experience in the respective fields.

Research and Development Divisions are developing the Practical and economic solutions for the needs, in the field of Electro-Mechanical and Bio Technology. They have delivered a number of innovative products according to the customer requirement.

Workplace Safety

Workplace safety begins and ends with you. It's your responsibility to stay current on the latest news and items to prevent workplace injuries.

Certificate of Registration

Issued to

AGRO BIOTECH INTRENATIONAL EXPORTS PVT. LTD

Carried out at following site:

NH-47 TRICHUR DIST THIRSSUR-680689, KERALA, INDIA.

for their

**ENVIRONMENT MANAGEMENT SYSTEM
ISO 14001:2004**

Scope of Activities covered by this Registration:

- 1) MANUFACTURING & TRADING OF MEDICATED PILLOW CASES, MEDICATED BED SHEETS, MEDICATED AGRO BAGS, SOLAR SYSTEM & EQUIPMENTS, ORGANIC FERTILISER, AGRO PRODUCTS, HERBS AND SPICES.
- 2) TRADING & SERVICING OF BIO FARMING AND SOLAR SYSTEM & EQUIPMENTS..
- 3) PROVIDING SERVICE OF MEDICAL TOURISAM, WEB PORTAL & CONSULTANCY.

Certificate no : AABIEPL101216Q220
Date of Issue : 10/12/2016
Date of Expiry: 09/11/2019
1st Surveillance on or before: 09/11/2017
2nd Surveillance on or before: 09/11/2018

Authorized by
Chairman / Director

This certificate remains the property of FC and must be returned to FC on Cancellation or Suspension of the certificate. Validity of the certificate is subject to successful completion of surveillance audits. Further clarification regarding the scope of this certificate and the applicability of standard may be obtained by consulting the Organisation on.

Company Profile

-  Latest Technology
-  24 X 7 Support
-  Worth for Investment
-  Resonable Price

abiel is the short name of Agro Biotech International Exports Private Limited always a step ahead for the safety and security of the Environment. An ISO 9001 QMS and ISO 14001 EMS certified company never which compromises with the Quality and Safety. According to

the pre planned programs all the activities are executed within the stipulated time.

Kerala Spices

The South Indian Spices have its own market in the International sectors. We have our own plantations; leased plantations and long term contract based farming with cooperative societies or farmers to ensure the quality and availability of the products.

South Indian Herbals

We are one of the leading growers of Herbs and spices in South India. We are supplying quality products at a reasonable rate. The additional products required are collected directly from farmers and societies, assuring the Quality.

Waste Management

Treating the Agricultural waste in a specific manner, will have a lesser carbon dioxide and methane emissions. The resulting product is ideal for organic farming. Composting is the natural process of rotting or decomposition of organic matter by microorganisms under controlled conditions. Aerobic composting in the presence of oxygen with low methane emission have no bad smell at high temperature aid rapid decomposition and lower salinity.

Fruits & Vegetables

The prime range includes various types of Indian fruits & vegetables. We are supplying premium fresh fruits to the customers. We collect fruits from highly reputed and reliable farmers who guarantee the quality of their products. Natural production techniques are maintained in hygienic conditions and health conscious cultivation ensures that every fruit is full of nutrients and is healthy.

Organic Plantations

Organic farming is a biological process, driven by microorganisms, that allows the natural production of nutrients in the soil throughout the growing season, and has been referred to as *feeding the soil to feed the plant*. Various methods are employed, including crop rotation, green manure, cover cropping, application of compost, and mulching. Organic farmers also use processed natural fertilizers such as seed meal, and various mineral powders such as rock phosphate and greensand, a naturally occurring form of potash.

Bio Fertilizers

We thrive to be a global organization creating wealth from waste – through green processes and by using carbon neutral and positive resources – thereby preserving and enhancing the eco-systems for healthy living of mankind. To provide quality products, in health care and agriculture, manufactured using regenerated resources through biochemical processes, continuously improved by innovative research. We shall achieve this with a dedicated, passionate team and sustained community participation. Agro Plus is a complete Organic Fertilizer that can be used as the substitute for all inorganic fertilizers. It is pre processed for immediate bio-availability of nutrients and hence will give faster response in the plants.

Project Consultancy

Consultancy divisions have a pool of experienced professionals, who worked in different countries and their service is available throughout the projects. We have a proven service record of accomplishments extends worldwide for providing exceptional quality, innovative management and professional integrity in design and management of capital projects. Our dynamic project managers, construction managers, engineers, environmental and regulatory specialists, designers, CADD operators, and inspectors all understands that successful partnerships with our clients depend on consistently delivering products beyond expectations.

Research & Development

Top technology and innovative products do not happen by chance. Our R&D Division is managed by the dedicated, experienced professionals developed a number of products in Renewable Energy , Agriculture, Medicinal products.

Medicated Fabric

Medicated bed sheet, pillow cases and agro bags act as the first line of defense against infestation by parasitic insects arthropods like, Bedbugs, Cockroach, head lice, Bed mite etc.. It is never harmful to humans, Birds or animals. The medicated fabric has no smell or colour or Taste. It is basically targeted against arthropods like, Bedbugs, Cockroach, head lice, Bed mite etc.. The **pyrethrins** and their derivatives are a group of compounds which have a potent insect repellent activity. Pyrethrins are present in chrysanthemum and daisy and are neurotoxins that attack the nervous system of all insects (arthropods). The action is mediated through an enzyme present only in insects.

Medicated Fabric is the perfect choice for people, who are looking forward to protecting themselves, from the Insects without exposing themselves to harmful chemicals. The fabric treatment does not involve any harmful chemicals and they are mostly derived from the oils extracted from the plants. This makes them perfectly safe for use.

The Medicated **Agro Bags.**

The medicated agro Bags has to insert in the Gunny bags, before filling Food grains, Herbs and spices. The agro bag will protect from all kinds of insects attacks and keep the stuff safe and secure. The harmful fumigation process can be avoided.

The Medicated **Bed Sheets.**

The Medicated Bed Sheet is the best and universally acceptable method of bug control and is the best option for the ,hospitals, hostels, resorts, luxury buses, theatres, hotel industry against bed bugs, allergens, dust mites, head lice, and dirt.

The Medicated **Pillow Case.**

The Medicated Pillowcase is eliminating the head lice. The Pyrethrins kill crawling lice, not un-hatched nits. Recommended use in next 7-10 days to kill any newly hatched lice. It is so ideal for the School going kids. It will help avoid the serious infections may occur due to the head lice.

The Medicated **Gown.**

The Medicated Gown Giving protection from the various insects are presented in the Estate, Farms, Plantations, Forest Areas etc.. It is the ideal choice for the Tourists, Scholars, Researchers, Employs etc..

The Medicated Kitchen Guard is really an expert solution for keep the Perfect solution against Cockroaches, Ants, centipedes and millipedes in kitchen shelves and other shelves

The Medicated Books Guard is actually a blessing to the librarians and who loves the Books, Files and paper documents gets protection from termites, Silver fish, cockroaches etc..

The Medicated Bakery Guard is the permanent solution for keep the food staffs in hygienic method in the display counters or cabins of bakeries, Restaurants, Super markets, Food malls etc.. The Medicated card protects the entry of Flies, Ants, cockroaches etc...

PORTABLE SOLAR COTTON PICKER AND HOME POWER SYSTEM

Picks Cotton Faster, Makes Homes Brighter

Hand held Solar Cotton Plucker

Company Profile

Abiel Portable Solar Cotton Plucker includes a light weight hand held cotton picker powered by a sleek backpack solar panel. Abiel increases cotton picking efficiency by using solar power.

Technical Specifications	
Picking Capacity	180 to 200kg/day
Speed	5400r/min
Total Weight	620g
Charging Time	About 3 Hours
Discharge Time	Above 6 Hours
Voltage	DC 12V
Consumption	11 Watts
Battery Capacity	Lead Acid SMF 12V7AH
Powered By	Solar Panel
Charged by	MPPT Controller
PICKER DIMENSIONS	280X90X110 MM
Multi pin mobile charger	6 Mobile at a time
lighting system	8W Surface Mound LED
Bag Specifications	
Collection Bag Capacity	5Kg Raw Cotton
Material	120 GSM Non Woven
Pouch	For keeping Battery
Material	Canvas
Back pack Bag	For Keeping Solar Panel
6 Months Comprehensive Warranty	

Really this is a multipurpose product. It can be used for picking the raw cotton directly from the cotton plants, in the harvest time. **Anybody can operate** the hand held solar cotton plucker without much effort. It is a **maintenance free Machine.**

The easy operated machine can **pick the cotton without the dry leaves.** The productivity is so high **180 to 200 kg can be harvested** within 8 hours time. The battery will **get charged within 3Hrs.** time in Sunny days. The discharge will be more than 6 Hrs. It will **charge the battery while in operation.** **No more charging from conventional Electricity.**

Additional Features

8 Watts LED Tubes, No more struck in plant branches, Mobile Charger for 6 Mobile at a time. It **can be used even non harvest time.** The day time the Battery get charged through solar panel. It can be used for **home lighting**

Solar Cotton Picking Machine Burkina Faso Project : 2,000 Systems Cost: 7,00,000 US\$

Burkina Faso is a landlocked country in West Africa around 274,200 square kilometers in size. It is surrounded by six countries: Mali to the north; Niger to the east; Benin to the southeast; Togo and Ghana to the south; and Ivory Coast to the southwest. Its capital is Ouagadougou as of 2014.

The Country is one of the leading fine Cotton producers in the world. The production is reduced due to the availability of the labour.

The Carbola International is one of the major cotton-contract farming firms in Burkina Faso. They tied up with the Agro Biotech International Exports Private Limited to develop the Solar based cotton picking machine, which can harvest an average of 180 KG per day. It is more than 10 times production capacity of an experienced labour.

The Cotton cultivation is taking place at the outer skirts of the capital Ogadago. The availability of Electricity is limited. So the machine has to be powered from solar energy and to be stored with 12V Battery. The panel is mounted as backpack model. It will be charged during the day time, while harvesting the cotton buds from the field. It has the facility to harvest in the early morning and evening because of the battery backup. The battery still have to power to provide the LED lights for their home and charge their Mobile phones.

The carbola International trained the youths to take care of the maintenance of the system by the assistance of ABIEL. The battery is to be replaced every year. The normal harvesting period is November to January of every year.

The ABIEL developed the Solar based DC centrifugal Water pumps to take care of the irrigation solution of the small farmers. 1/2HP to 25HP Water pumps are used for the Agriculture purpose.

Developed the Off Grid Sine wave Power Control Unit with Digital Signal Processing Technology. Really it was a challenge to develop a cost effective UPS without comprising all the safety and security features. We are making the products with a additional 20% efficiency of 800W, 1,200 W, 2,000W, 3,000W and 5,000W in Single phase. This is a Maintenance free product.

	Particulars	GF80012	GF80024
Input	Load Capacity	800 W / 1 KVA	800 W / 1 KVA
	Digital Display	Solar, Battery and load Status	
	230V AC	Not Recommended (Optional)	
	Solar Tubular Battery	12VDC 150AH	24 VDC 150AH
	Solar Panel	250W Poly Crystal	500W Poly Crystal
	Charging Time	Average 3Hrs. in Sunny Days	
	Solar Charging	5A-15A(auto)	
Output	Voltage	230V AC	
	Frequency	50-60HZ	
	Wave form	Pure Sine Wave	
	Wave distortion	≤ 3%	
Protection	System Output Overload	Yes to all	
	System High temperature	Overload 110%, 30seconds automatic closed-down;	
	Output high/low voltage	Overload 120%, 2seconds automatic closed-down; the buzzer sends out alarm sound	
	Battery low voltage		
	Battery over Discharge		
	Battery Over Charge	Output short-circuit, a buzzer ringing, 20 seconds after the automatic closed-down	
	Short circuit		

Company Profile

Off Grid Pure sine wave inverter is one of the most advanced DC to AC conversion products in the world, it is suitable use for areas without electricity, vehicles, ships, solar energy and other renewable energy systems and etc, can supply power and provide guarantee effectively for the areas with traffic inconveniences, in the mountains, pastoral, border, island and other areas without electricity. It has the main advantages of high quality sine wave AC output, microcomputer control, humanness design, and it is high efficiency and low no-load loss, and no pollution. In Home sector, it will bring **down the Electricity Bill** dramatically and **step Down the**

Billing slab.

Act now to save Energy

Solar AC Pumps

Products	
PV Solar Inverter with 2,500 W Single Phase	
PV Solar Inverter with 5,000 W Single Phase	
PV Solar inverter with 7,500 W Single Phase	
PV Solar inverter with 10 KW,15KW, 20KW, 25 KW Three Phase	
Features:	
Using advanced IGBT power module	
High conversion efficiency, low noise and long lifespan	
Advanced technology for maximum power point tracking (MPPT)	
More than 99% MPPT efficiency	
Wide input voltage range	
High efficiency at wide power range	
Advanced anti-island technology	
High reliability due to complete function	
MPPT and CTV running modes	
Multilingual LCD settings and various communication interfaces	
Adjustable protection and operation parameters	
Easy operation, installation and maintenance	
specifications:	
DC input:	
Maximum DC voltage	250 / 450V DC
MPP voltage range	150 to 380V DC
Maximum DC power	1650Wp
Maximum input current	8. to 72A
AC output:	
Output power	5K – 25KW
Current THDL	less than 3% (≥50% rated power)
Nominal voltage	230 to 430 V AC
Nominal frequency	47.5 – 60 Hz
Power factor	≥0.99 (≥50% rated power)
System:	
Maximum efficiency	93.5%
Euro efficiency	92.3%
Protection degree	IP65 (outdoor)
Operating temperature	-25 to +60°C
Cooling humidity	natural cooling
Relative humidity	0% to 98%, non-condensing
Communication interfaces	RS485/RS232 / USB
Display	LCD

- * High conversion efficiency, Max. Efficiency≥98%
- * Perfect protection and warning functions
- * Low Frequency Transformer, which ensures that inverter has high efficiency and low no-load loss.
- * Pure sine wave output, has higher efficiency and higher capability of driving load.
- * LCD display, high efficiency, easy installation.

Solar DC Pumps

Benefits

No conventional grid electricity
Long operating life
Highly reliable and durable
Easy to operate
Easy to Maintain
Eco-friendly
No fuel cost
abundantly available free solar energy
No inverter
D.C. motor connects directly to solar array
Rugged construction
Simple installation and maintenance
Highly reliable

FEATURES

Surface Types
¼ HP to 25 HP rating pumps
3 Position Manual Tracking
Easy to install
minimum maintenance
completely serviceable

System Components

Solar Photovoltaic Panels
Structure & Accessories
Solar submersible pump
Solar Controller / VFD

Applications

Booster service
Camp sites
General purpose pumping
Residential Use
Liquid transfer (Industry)
Small farm
Sprinkler Spraying systems
Water circulation swimming pool
Water supply for irrigation
Village water supply
Livestock watering
Water supply to remote homes
Micro-Irrigation poly House

abiel SOLAR ASSISTED PETROL PUMP

Being an ISO 9001 QMS 14001 EMS certified company, Agro Biotech International Exports Private Limited is a leading company in the field of Power Electronics, Consumer Electronics, Lighting and EPC Services. We have a well-trusted name, in all segments, where we operate. We design, Manufacture and market the Solar DSP / IGBT sine wave PCU inverters and Renewable Energy Products for Home and Industrial sectors. They have the function of energy conservation and environment protection. We Adopt MCU techniques having the various kinds of function such as Multi-setting Mode, MPPT Charge controller, Voltage stabilization on line, Short circuit protection, Inverter frequency adaptive, output over load, Battery Charging management, Monitoring etc.. Our Products are the ideal power with high cost performance equipped with high stability, high practical applicability. It has the main advantages of high quality sine wave AC output, microcomputer control, humanness design, and it is high efficiency and low no-load loss, and no pollution. In Home sector, it will bring down the Electricity Bill dramatically and step Down the Billing slab.

In today's era of globalization, our energy demands are continually increasing. We need to be always dependent of automotive transportation for all our needs. Petrol pumps in rural – remote area cannot function due to frequent, irregular and unpredictable power cuts. ABIEL has successfully implemented solar assisted petrol pumps with the help of their system integrator spread across world.

ABIEL PCU can be used to support demands of petrol pumps with multiple delivery nozzles.

Advantages

- Noise free
- Uninterrupted power supply
- No voltage fluctuations
- Can work in synchronization with Grid & DG sets
- Saves on day time expenditure of diesel used in DG sets
- No maintenance
- Income tax benefits
- Best solution for places with DG usage of more than 8 hrs
- Economic, Smaller, hybrid systems with battery banks
- Easily expandable
- Remote monitoring facility

System requirements:

- PCU: 5KVA for 2 Nozzels / 8KVA for 4 Nozzels
- BATTERIES: 12V-150AH Tubular-8Nos
- Solar PV Modules 300 wp 36VDC 72 cells
- Poly crystalline : 5-8KWp
- Panel mounting structure

Cross ventilated Poly House with Cooling system

We are promoting the high performed Cross-ventilated Poly houses for the 100% success in the agriculture field. It will ensure the organic farming without the pest attack. Have the controlled climate by the use of Solar power controlled temperature controls from 10 degree centigrade onwards in a cost effective way. The system will take care the 24 Hrs. into 365 days. The sensors will be prompt the system to control the moisture, humidity and temperature, as per the pre-programmed system, as per the requirement of the customer.

The size of the Cross-ventilated Poly house can be customised as per the requirement. The professional consultants will pay a visit at the customer site. Then design the height and width of the poly house, direction will be depend upon the Agro products, Wind and available sunlight. The company will take it as the Turn key projects.

White KASTHURIMANJAL

Scientific name :	Curcuma aromatica Salisb.	Family :	Zingiberaceae
English :	Wild Turmeric	Hindi :	Jangli haldi
		Sanskrit :	Aranyaharidra

Curcuma aromatica Salisb. mentioned as 'Vanaharidra' in Ayurveda, belongs to the 'ginger family' Zingiberaceae. It is a perennial herb with characteristic aromatic rhizomes used in many traditional systems of medicines in India, China and other Southeast Asian countries. The rhizome of the plant is rich in alkaloids, flavonoids, curcuminoids, tannins and terpenoids which are reported to be the reasons for its various pharmacological properties. The extraction of compounds in different solvents shows that the plant contains curdione, neocurdione, germacrone as its major components. Extensive literature survey showed that the plant has anticancerous, anti-obesity, anti-acne, antitussive, antioxidant, anti-inflammatory, antidiabetic and wound healing properties. The rhizome extract of the plant is highly effective against many human pathogens as well as microorganisms causing food spoilage and food borne diseases. The plant thus proves to be a promising candidate for the development and designing of modern drugs for several diseases.

CHEMICAL CONSTITUENT

Dry rhizome contains: 0.8% , Essential oil 10-11.5%

Oleoresin 0.7% , Crude fibre 0.04%

Main constituents of essential oil : Camphene, Methoxy cinnamic acid, Curcumene

It is a perennial rhizomatous herb with annulate, aromatic, cream coloured rhizome. Leaves are elliptic or lanceolate-oblong, 30-45 cm long, lower sides of leaves are hairy and smooth.

We haven't come across any ingredient that changes our skin color dramatically. Whenever see an advertisement promising fair skin, only think how misleading these advertisements are, spending billions of dollars to make it believe something that is not true. But there are natural ingredients that brighten our skin and white kashthuri manjal tops that list.

30 Grams of rhizomes, plant in a grow bag with Organic potting mixture (soil less), it will yield 3 to 5kg. the life cycle is 7 months only. We are advised to do the farming in a cross ventilated Gable type poly house. Heavy rain will drain out the fertile components of the potting mixture. It required an average 25ml to 50ml water in the alternative days. The panjagavyam, pranabrutham, fish amino liquids can be mix 50ml into 1 liter water, on fertigation system in alternative weeks. It will grow upto 70 to 90 cm height.

Hydroponic Fodder System

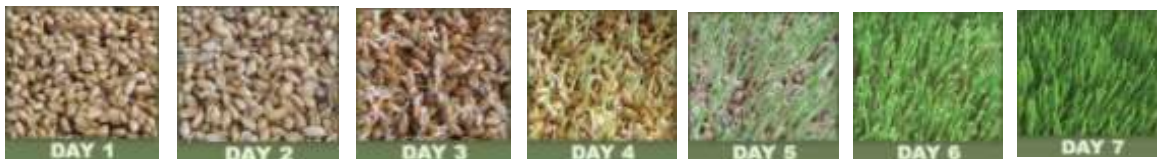

Hydroponics technology is a young green grass food production system as an efficient answer to the most basic requirement of modern living by providing a clean, economically and environmentally sustainable production of food.

It has been grown from grain or grass seeds grown in 7 days in a controlled environment using very sustainable and eco friendly technology. This 6-8" long green grass is fed directly to livestock as a replacement for grain and for a significant percentage of the normal hay feeding amounts.

Feeding fodder will result in higher milk production in dairy cattle and increased natural weight gain in beef cattle and young stock. 1.5KG seeds can be converted to 8.5KG grass within 7 days time. It is low cost and high protein feed. It is ideal for small farmers to high end. Low operational cost and high return is the main advantages of this system.

GRAND | HYATT

abiel (Agro Biotech international Exports Private Limited) is the reputed Exporter and Importer currently engaged in AGRICULTURAL, SPICES, Fruits and HERBAL products. Since the establishment of the company in the year 2010, we have been successfully catering to the requirements of domestic as well as overseas clients. Provide a wide range of technical products and solutions worldwide for House hold Products, renewable energy Products, Medicated Products, Agriculture, Organic Products etc.... We provide consultancy for complete engineering and turnkey solutions worldwide based on their need and requirements.

Microgreens

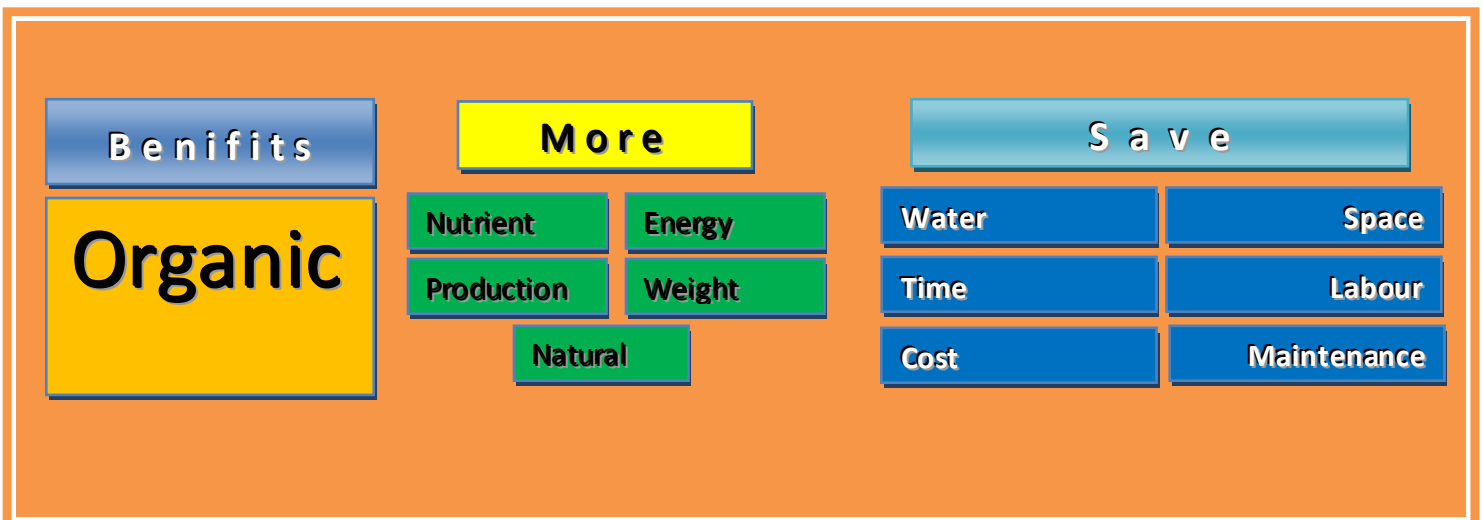

They are tiny edible greens grown from vegetable or herb seeds. They are getting harvested, when very young - just 1-2 inches long including the stem and leaves. Microgreens can have wonderfully clear, intense flavours and they are certainly a very pretty addition to your plate, with their delicate and often colourful appearance. Microgreens are a hot trend in the food and nutrition world. People wanting to improve their health and wellness through nutrition are sneaking microgreens in their smoothies, piling them on sandwiches, mixing them into salads etc..

Sprouts and microgreens are not the same. Sprouts are usually grown in water and harvested within 2-3 days while microgreens are grown in soil, require sunlight, and are harvested after 1-3 weeks of growing time, when they are about 2 inches tall. Baby greens are grown for longer periods and are usually around 3-4 inches tall when they are harvested.

There is a huge variety of microgreens available, ranging from different kinds of vegetables to even some types of herbs. Some of the most popular types of microgreens include:

Arugula	Amaranth	Basil	Beets
Cabbage	Carrots	Celery	Chard
Chia	Chives	Cilantro	Dill
Fennel	Garden Cress	Kale	Mint
Mizuna	Mustard	Orach	Parsley
Radish	Sunflower	Watercress	

Microgreens can boost color, enhance flavour, and add texture to any dish, while delivering a nutritional boost as well.

Medicated Bed Sheet

العلاج رقة السرير
Hoja de cama medicado
Medizinisches Bett-Blatt
Médicamenteux Bed Sheet

Instructions

Spread the Medicated Bed sheet directly over the Mattress.
Fold in all the four side under the Bed and fasten with the Velcro tapes.
Spread another cotton Bed Sheet, over the Medicated Bed Sheet.
This will save the washing cycle of the medicated sheet.

Information

This will not sanitise the unhatched Eggs which will be sanitized at the time of hatching.
Use minimum 18 Days for complete eradication in a Bed.
In areas where more than one mattress are used for sleeping, all the mattresses should be treated simultaneously.
For the best result, use within 90 days of opening of the Package.
The efficiency will be reduced on exposure to direct Sun light, or higher temperature or spillage of water or other liquids on the medicated sheet.
Always store in a dark, cool place.

Effectively sanitizing 90% of bed bugs within 5 seconds of contact. The rest within 30 minutes.

Ingredients :
Natural Pyrethrin,
Herbal Extracts

PRODUCT OF INDIA

The Product is Bio-degradable, Non toxic and Non Polluting

Never harmful to Human beings, Birds or Animals.
