

READYPOINT™

The Future of Workforce Readiness Starts Before the First Task Begins

Patent Pending

U.S. Provisional Patent Application No. 64/106,511

Executive Summary

Every year employers lose billions of dollars to preventable injuries, fatigue, dehydration, reduced productivity, absenteeism, and unplanned downtime. ReadyPoint™ is a patent-pending workforce readiness platform designed to help organizations evaluate whether employees are prepared to safely begin work before entering safety-sensitive environments.

The Opportunity

ReadyPoint is intended to provide a fast, non-diagnostic assessment of key workforce readiness indicators in approximately 90 seconds. The platform is envisioned for utilities, construction, manufacturing, transportation, municipalities, mining, oil & gas, emergency services, warehousing, and other safety-focused industries.

Potential Capabilities

- Hydration assessment
- Blood pressure
- Heart rate
- Oxygen saturation (SpO₂)
- Temperature
- Grip strength
- Reaction time
- Weight/BMI
- Secure digital reporting and trend analytics

Why Partner?

ReadyPoint is intended to complement—not replace—existing occupational health and safety programs. We are seeking a strategic licensing, development, manufacturing, or commercialization partner with expertise in industrial safety, occupational health, workforce software, medical technology, or connected hardware.

Confidential Business Discussion Requested

This document is provided solely to evaluate potential licensing or strategic partnership opportunities. Additional technical information is available upon request.
