

The market does not lack peptide science. It lacks assets that are usable, repeatable and transaction-ready. ATLAS packages IP + know-how into selective commercial and licensing doors — built for industrial buyers and intermediaries, not as a science hobby.

WHY LOOK NOW

Commercial engines, not a science hobby

Two go-to-market platforms designed as product systems (protocol, format, channel) — ready to white-label, license, or absorb into an existing brand P&L.

Stability as reusable infrastructure

Cross-cutting peptide stability/formulation architecture meant to travel across SKUs and partners — fewer one-off reformulations for CDMOs and formulators.

Delivery as modular licensing

Nanovesicle and transmucosal engines structured for field / territory / payload licensing — plug into an incumbent pipeline without buying the whole stack.

Selective exits, diligence-ready

Packages: commercial CORE, ENABLER (stability), DELIVERY modules, or ALL. Staged disclosure: teaser → NDA room → clean-team.

PORTFOLIO DOORS

COMMERCIAL NOW

P07 Peripheral GLP-1 Companion Engine™ — skin/hair aesthetics during body-composition change.

P11 PeptiLaser Recover™ — professional post-procedure recovery (product + protocol + B2B replenishment).

LICENSING LAYERS

P01 STAB-X™ — peptide stability & formulation.

P05 PDNV™ — plant-derived nanovesicle delivery.

P06 Transmucosal Delivery Engine™ — directional / buccal concepts.

STRATEGIC OPTIONS

Access modulation · cyber-physical trusted delivery · biofunctional matrix · smart packaging/biosensor · dipeptide–metal ingredients · non-GMM bioprocess media.

WHAT YOU GET

- Master IP packages + trade secrets / know-how
- Preliminary FTO workstream materials (under NDA)
- Production & business models for transfer
- Deal shapes: portfolio sale · selective packages · license · white-label / territorial · know-how transfer

IDEAL COUNTERPARTIES

CDMOs · beauty / dermocosmetic groups · pharma & biotech BD · ingredient houses · IP intermediaries & open-innovation desks.

Reference markets only (not ATLAS TAM): peptide therapeutics · drug delivery · skincare · medical aesthetics · bioprocess media.

Next step: Innoget RFI → 15-min call → NDA → confidential dossier / data room.
