

# FREEBAC-MUCUSOL

## De-sliming agent

Freebac-Mucusal is a de-sliming agent, widely used in the fish processing industry. It's main purpose is to de-slime fish, before processing it.

Freebac-Mucusal is used for 'soft' fish species like salmon, trout etc.

### Instructions for use

- Make a solution of 2 litres Mucusal with 100 litres water.
- Add 300 kilogram fish (use a tub e.g.)
- Wait for 15-20 minutes
- The fish has been deslimed

### Features

- + Removal of the slime layer
- + No fish slime in your process
- + Prevents the growth and the presence of Listeria bacteria
- + Scientific evidence based product
- + No disinfectant / no biocide

### Advantages

- + No organoleptic changes
- + No color changes
- + Fewer employees needed
